

Maya Chen

Computer Science Student | Applied AI and Data Systems

maya.chen.demo@example.com

Boston, MA

Expected May 2028

EDUCATION

Northstar Institute of Technology - B.S. Computer Science, expected 2028

Relevant coursework: Data Structures, Database Systems, Machine Learning, Cloud Computing

SKILLS

Languages: Python, SQL, JavaScript, Java **AI/Data:** LangGraph, LangChain, pandas, scikit-learn **Cloud/Tools:** AWS, Git, Docker, Streamlit

EXPERIENCE

Student Research Assistant - Northstar AI Lab | Sep 2025 - Present

- Evaluated retrieval pipelines on synthetic academic data and documented repeatable quality tests.
- Built Python tools that reduced experiment setup time by 30 percent.
- Presented model evaluation findings to a six-person lab team.

Software Engineering Intern - Harbor Learning Labs | May 2025 - Aug 2025

- Developed SQL-backed analytics for a synthetic learning platform.
- Added automated API tests and improved error diagnostics for the student dashboard.

PROJECTS

Campus Opportunity Navigator - Python, LangGraph, AWS

Created a controlled career workflow that extracts evidence from student documents, asks for confirmation, and stores profile facts.

Study Group Matcher - Python, SQL, Streamlit

Built a privacy-conscious matching prototype using synthetic student preferences and explainable ranking rules.

LEADERSHIP

Project Lead, Open Source Student Club - coordinated four students, reviewed pull requests, and ran weekly beginner workshops.

Synthetic document created exclusively for the CareerTrace AI judge demo. It contains no real personal information.
